One Man Stands Out
When and if the President re-enters, he probably will name. But it is only natural that the leadership campaign for thwarting Presidential plans will absorb its share of the news...
The question is: Who threw the punches that killed the plan to enlarge the Supreme Court? The people claim credit for that. But one man took the strategic offensive, wore the coup de grace was delivered...
The man is Burton K. Wheeler, the sandy-haired senatorial firebrand from Montana. There's little question, furthermore, that Wheeler represents, perhaps typifies—the opposition to the President's 1937 program more nearly than any other person...
Wheeler's Philosophy
Senator Wheeler thinks there is a difference between his size and the President's. They differ accordingly, however, on method...

Under the American system, the President can gain his end only by having a subversive Congress set up boards and bureaus to make rules of conduct, and by winning favorable Supreme Court opinions to uphold this procedure...
But the President is hazardous. Either they will crawl under the heels of the President and make him a dictator, whether he wants to be or not, or the rule-making bureaus will send self themselves dominated by the interests they are supposed to curb...
Points to N.Y.A.
To prove his point, I nominate such a miserable fellow as N.Y.A., that of political recall, the Federal Trade Commission...
On the other hand, Mr. Roosevelt's bureau is to be the growth of monopoly across the state lines. It is true that local county and state governments find themselves impotent to deal with economic royalists whose business encompasses several or many states...
So it is my opinion that, when we find such a situation, the federal government should try first some form of regulation to aid the states in correcting the evil...
Falling this, the Congress should step in and do the job by prescribing a clear, concise and understandable federal law regulating interstate commerce. But we should emphasize localized control of our economy wherever possible...
