MONEY SAVED IS
MONEY EARNED!

And here is a chance to both save it and earn it. Too much stock is the cause of it. Too many goods for us to take a chance of having an overstock at the end of the season, so will sell them to you at retail price. You can now when you still need the goods. Less of people, with the money in their pocket, have you at buying, waiting for lower prices. Clothing that was splendid value at the beginning of the season, is now marked down one-quarter to one-half. We have the same, styles are the same, the goods are the same, but the price is different. Less of things we need to keep you warm at small prices.
